

Workspace before-and-after record

Three original illustrated room pairs. These are fictional, not repair or medical evidence. Compare observations from the same viewpoint.

01 Desk surface

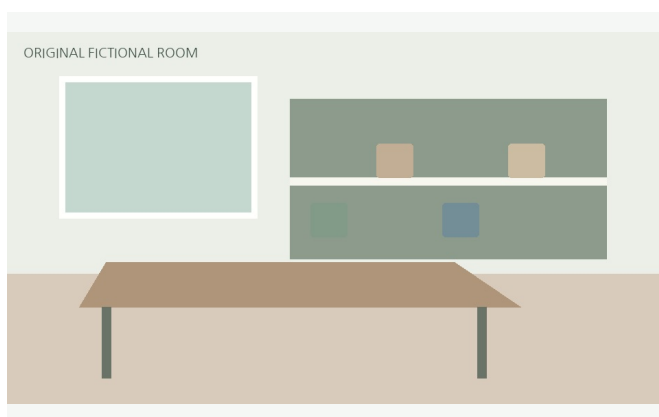

Before

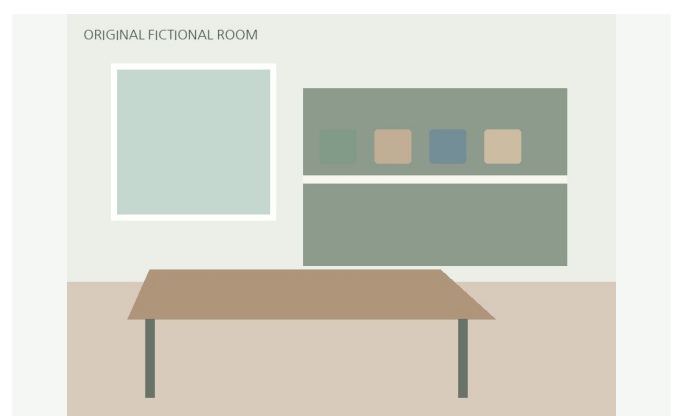

After

Before: four items sit on the desk. After: they are moved to the shelf, clearing the desk. Surface damage and shelf load capacity have not been checked.

02 Shelf arrangement

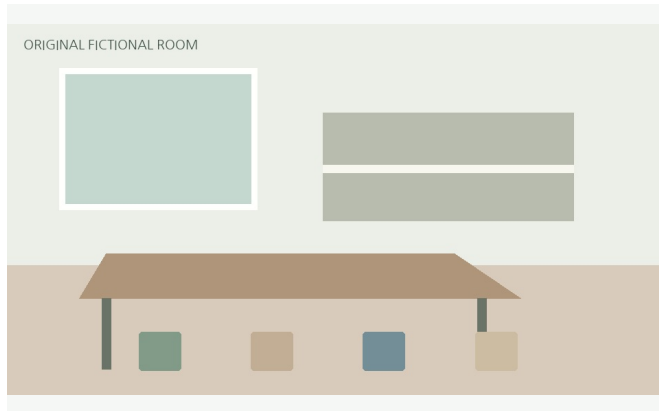

Before

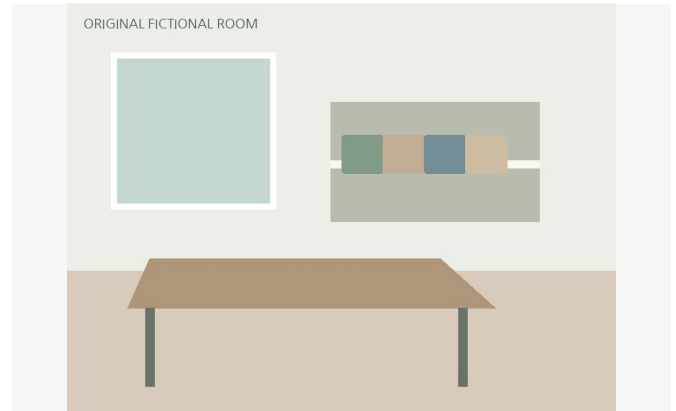

After

Before: four items are split between two shelf levels. After: they form one row, leaving the lower level clear. Colors aid identification; real item types and inventory have not been verified.

03 Floor access

Before

After

Before: four items sit on the floor beneath the desk. After: they are moved to the shelf. Illustrated viewpoints and proportions differ; do not infer measured clearance or safety.
